The premises

The clinic is fully air-conditioned, with a modern and comfortable waiting room tastefully decorated with soft colours and provided with a play-area for children. You will be assisted by our friendly team of receptionists at all times. All our clinics are available to patients with restricted mobility, and are fully equipped with a wide range of modern medical equipment.

he premises

Direct Digital Ortho-Pantomograph

The latest technology of digital X-rays for dental application.
takes an X-ray of all your teeth (full face X-ray) at the lowest possible dose.
This system allows for the best fit of Dental Implants - New!

igital

Dental clinic

We make no compromise where quality of care is concerned, and we aim to consistently provide a high standard of care in all aspects of dentistry. Our dental chair is ergonomically designed with patient comfort in mind, and we follow the current trend in using disposable equipment whenever possible. Non-disposable instruments are sterilised in a vacuum autoclave, which is the latest advance in sterilisation standards. A collimated X-Ray machine situated at the chairside enables the taking of radiographs in the comfort of the dental chair, whilst reducing the amount of harmful scattered radiation to a minimum.
